

## OBEM

<b>Province:</b>	Biella
<b>Web site:</b>	<a href="http://www.obem.com">www.obem.com</a>
<b>Sectors:</b>	Textile machineries, Dyeing, Apparel & furnishing products, Others
<b>Company activity:</b>	The OBEM company was established in 1946, in Biella, a textile centre located in the Northern Italy, well known for its high concentration of companies producing top quality yarns, fabrics and garments. Since the beginning, OBEM has always worked in direct cooperation with this experienced background, developing machines and innovative solutions that were tested and approved by the strict quality specifications of its local customers, and then sold and installed worldwide. The OBEM production has two main branches: Steaming and Dyeing. The Steaming line includes vacuum and pressure autoclaves, for twist setting and thermosetting, with particular solutions for moisture regain on cotton yarns. The machines size varies from 50:100 kg to 2000 kg and more; their main keys are the structure made in stainless steel and the internal forced ventilation, that ensures an homogeneous distribution of the saturated steam. Other uses are possible, with autoclaves expressly designed on specific customer demand, like sterilisation of medical goods, vigoureux printing development, annealing process of synthetic fibre tow, etc. The Dyeing line covers all the range of machines for packages, hank, tow, tops, loose fibres, fabric, socks and pantyhose dyein, with capacity from small lots for laboratory purposes, to 2 - 3 tons per single apparatus.
<b>Turnover:</b>	4.660.450,00 €
